

Seminole Hospital District is Committed to Our Doctors and Our Community

Seminole Hospital District is aware of misinformation in our community regarding doctor contract renegotiations and would like to provide clarity.

- ✚ *Seminole Hospital District truly values our doctors and the contributions they've made to our community and our patients. However, the Federal Government has imposed limitations on how doctors can be compensated.*
- ✚ *The reason we are renegotiating doctor contracts is because Federal and State Law requires us to make sure that our payments to our doctors are within Fair Market Value (FMV). The Government's goal is to protect the taxpayer from overpaying for medical services.*
- ✚ *Seminole Hospital District wants all of our doctors to stay, but the law will not let us pay them more than Fair Market Value (FMV) for their services.*
- ✚ *We were unable to bring the doctors into the discussion early due to constraints imposed on us by Federal and State Law.*

Our doctors are not only an important part of the hospital, they are important to our schools, our churches, our local businesses and our community. We would appreciate your support of Seminole Hospital District and our doctors as we work our way through this process.
